

- Download the dataset from here -
<https://www.kaggle.com/fanconic/skin-cancer-malignant-vs-benign>
The size of dataset is 164 MB
- Upload the dataset on google drive (if using google colab for GPU)
- Download the code (ipynb file) from :
<https://github.com/MeetDave324/Melanoma-Detection-using-CNN>
- Change the dataset location in the ipynb to your dataset path
- Run the code
